SUMMARY

Computer Science undergraduate with 6 months of full-stack internship experience building practical web applications using React.js, Node.js, Express.js, MongoDB, and REST APIs. Built AI, e-commerce, and event management platforms with authentication, payments, dashboards, debugging, validation, and secure API workflows.

EDUCATION

MIT ADT University, Pune — Pune, India
B.Tech in Computer Science and Engineering | CGPA: 8.9/10 — 2023 – 2027

TECHNICAL SKILLS

Languages: C++, JavaScript, TypeScript, SQL, Python
Frontend: React.js, Next.js, HTML5, CSS3, Responsive Web Design
Backend: Node.js, Express.js, REST APIs, JWT Authentication, API Validation, Backend Routing
Databases and Tools: MongoDB, MySQL, Mongoose, Git, GitHub, Docker, Postman, VS Code
Core Concepts: SDLC, OOP, Debugging, Code Review, API Testing, Secure Coding, Defect Analysis

EXPERIENCE

Full Stack Developer Intern — **Jan 2025 – Jun 2025**
Hackosquad — *Remote*

- Engineered 8 production-style full-stack features using React.js, Node.js, Express.js, MongoDB, and REST APIs, contributing to 3 delivery milestones.
- Built 10 reusable UI components and backend routes, reducing repeated development effort across project modules.
- Resolved 15 software issues through structured testing, debugging, root-cause analysis, and fix validation, improving application stability.
- Collaborated with a 4-member technical team through Git workflows, code reviews, and feature documentation to maintain consistent code quality.

PROJECTS

IDEA: AI Full Stack Application Builder — **Apr 2026**
React.js, Node.js, Express.js, MongoDB, REST APIs, JWT, GPT, Gemini, Claude

- Built an AI platform that converts natural language prompts into deployable full-stack applications using GPT, Gemini, and Claude APIs.
- Designed 12 REST API routes for authentication, prompt handling, code generation, validation, and structured API responses.
- Improved code-generation reliability by adding retry logic, error handling, and output validation checks for generated code.

Edisip: Full Stack E-Commerce Platform — **Oct 2025**
React.js, Next.js, Node.js, Express.js, MongoDB, REST APIs, Payments

- Architected a complete e-commerce platform with 6 core modules covering products, cart, checkout, orders, users, and dashboard.
- Integrated payment gateway workflows with transaction APIs, order confirmation, authentication, and protected user sessions.
- Delivered 10 frontend pages and backend endpoints for product management, data persistence, checkout, and order processing.

UniConnect: University Club Event Management Platform — **Nov 2024**
React.js, Node.js, Express.js, MongoDB, REST APIs, Authentication

- Created a MERN platform to manage 3 event workflows covering event creation, student sign-ups, and admin approvals.
- Implemented role-based access for 2 admin levels using protected routes, REST APIs, and permission-based controls.
- Reduced manual tracking by digitizing event updates, participant records, approval flows, and dashboard operations.

LEADERSHIP AND INVOLVEMENT

Technical Team Member — **Jan 2025 – Present**
ACES Club, MIT ADT University — *Pune, India*

- Delivered 3 digital systems for college events, including websites, dashboards, registration tools, and support applications.
- Coordinated with 5 team members to maintain 4 live web interfaces, test event features, and resolve technical issues during 3 college events.
